

LEGACY COLLABORATIVE

Collaborative isn't just a name; it's a reflection of our core ethos. Formed with the vision of creating a lasting legacy for both our clients and employees alike, we are more than just an engineering firm—we're a collaborative force driven by our core values. Integrity, collaboration, relationship-building, and unwavering quality serve as the foundation upon which we operate.

ABOUT US

As a small business engineering firm, we specialize in delivering exceptional quality in every project we undertake. With a diverse portfolio ranging from small-scale facilities to intricate structures nationwide, our team harnesses decades of combined experience across various market sectors. With a leadership team boasting over 75 years of collective expertise, our dedication to quality and client satisfaction remains unwavering.

At Legacy Collaborative, we believe in more than just completing projects; we strive to cultivate enduring partnerships that stand the test of time.

Let's Create Your Legacy

15 Employees

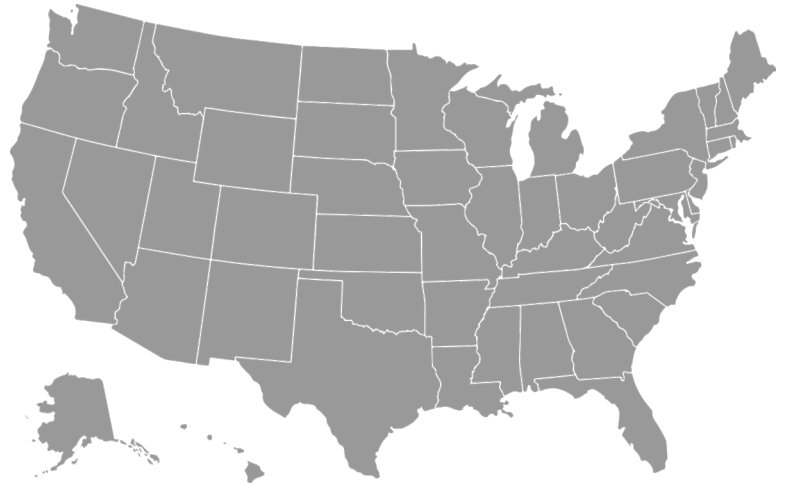

Engineers registered in 26 States across the US, plus Puerto Rico

Established QA/QC process to ensure project success

75 Years of collective experience between our leadership team

Legacy Collaborative has extensive experience in various building types encompassing new builds, renovations, and expansions of current infrastructures. The projects we have undertaken span a wide array of sectors, including federal, administrative, educational, commercial, and retail domains. These projects adhere to regulatory frameworks such as the International Building Code (IBC), state and local statutes, as well as the Department of Defense's guidelines, ensuring compliance with Minimum Anti-Terrorism Standards for Buildings.
